Fragebogen für Bogenabstapler - Questionnaire for Sheet Stacker

Hersteller Maschine manufacturer machine		
Maschinen-Typ machine type		
Bogenformat (WxL) sheet size (WxL)	 min. Breite W sheet width W mm Länge L sheet length L mm max. Breite W sheet width W mm Länge L sheet length L mm	
Bogenmaterial sheet material	Papier paper ☐ Karton oder Vollpappe carton or cardboard ☐ Wellpappe (nur geschlossen) corrugated board (only closed) ☐ Folie foil ☐ Sonstiges others	
Materialgewicht material weight	Materialstärke thickness of material	Materialdichte Material density
min. g/m ²	min. mm / (µm)	min. kg/m ³
max. g/m ²	max. mm / (µm)	max. kg/m ³

Einzelbogenförderung
sheet after sheet (single sheets)

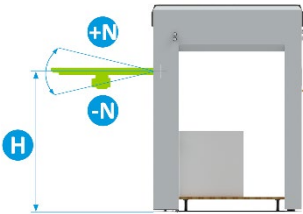

Bogenabstand: 200 mm
bei < 200 mm reduziert sich ggf. die Geschwindigkeit
Sheet distance: 200 mm
with < 200 mm the speed is eventually reduced

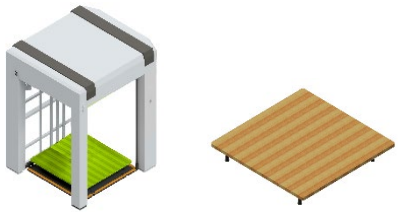

min. Lücke C bei L
min. gap C at L mm

max. Lücke C bei L
max. gap C at L mm

Fragebogen für Bogenabstapler - Questionnaire for Sheet Stacker

Bogenleistung max. sheet capacity max.	 Bogen/Stunde sheets/hour	oder or	 m/min
Stapelgewicht pile weight	max. kg		
Gewünschte Stapelhöhe, einschließlich Palette oder Stapeltische required pile height, pallet or pile table included	max. mm		
Art und Höhe der verwendeten Palette Type and height of the pallet			
Antriebsart Drive system	Eigenantrieb durch Servomotor Own drive by servo motor		
Mit Zuführtisch with delivery table ☐  Bogenübergabehöhe H height of sheet delivery H H = mm Zuführtischneigung N Slope of delivery table N N = mm		Ohne Zuführtisch without delivery table ☐  Bogeneinlaufhöhe H sheet inlet height H H = mm	
Zuführtischeinbau mounting of delivery table	starr ☐ oder schwenkbar ☐ fixed or swivelling		

Fragebogen für Bogenabstapler - Questionnaire for Sheet Stacker

Welche Farbe erhält der Abstapler? (Bitte Farbmuster auf Metall beifügen) What colour do you request for the stacker? (Please enclose colour sample on metal.)		
Stapeltische (2) pile tables (2)		ja ☐ nein ☐ yes no
		

Elektrische Daten / electrical data

Funktionen über	Tasten (Standard) ☐ (erfordert speicherprogrammierbare Steuerung (SPS) – durch MABEG) Buttons (standard) (requires stored program control (PLC) - by MABEG)	oder or	Touch ☐ (erfordert speicherprogrammierbare Steuerung (SPS) – durch MABEG) Touch (requires stored program control (PLC) - by MABEG)
Betriebsspannung operating voltage	Standard ☐ 3x 400 Volt 50/60 Hz/Cy	oder or	3x / Volt ☐ Hz/Cy

More than 75 years MABEG

MABEG has been focusing on Sheet Handling and Reel Sheetting for over 75 years.

We like to compare ourselves with the leaf-cutting ant. Like us, it has specialized in the persistent cutting and transporting of leaves.

We started with Sheet Feeders and Reel Sheetters. Over the years, we have continuously developed, and we have updated, improved and expanded our product portfolio.

Our three cubes show what this includes: **machines**, **components** and **service**.

The **grey cube** reflects our machines. This includes our Sheet Feeders (MSF), our Sheet Stackers (MST), our Modular Sheet Processors or Modular Sheet Inspection Lines (MSP) as well as our Reel Sheetters (RS).

Our components are found in the **blue cube**. This includes our Suction Heads and Sheet Alignment, such as our Side Lays. So, our Suction Heads are the heart of our Sheet Feeders and the precise Sheet Alignment is the basis for the further transport of a sheet.

The **green cube** covers the complete service range. This includes, for example, the installation and maintenance of the machines or the spare and wear parts.

We are proud of our core competence: Sheet Handling. Our years of experience, our unique know-how and our competent team make us a reliable specialist provider.

Would you like to learn more about us?
